

Essential care and maintenance for your Extend & Climb ladder

- ▶ *Ideal for attic access, internal or external maintenance & decorating*
- ▶ *Strong and robust*
- ▶ *Easy to use*
- ▶ *Easily stored in a car boot or cupboard*
- ▶ *Safely extends to 3.8m and locks rung by rung*
- ▶ *Certified to EN131*

- * Closed length – 0.76m
- * Fully extended length – 3.8m
- * Width – 0.48m
- * Weight – 12.5kg
- * Certified to EN131

- * Never use WD40 or lubricants of that nature - they will attract dirt and dust which will clog,
- * Never leave your X&C out in the rain - moving components will clog up and rust,
- * To lubricate/clean your X&C use furniture wipes (such as www.pledge.com/furniture-care/) - which remove dirt and leave a thin wax coating for smooth operation,
- * If your ladder is excessively wet use silicone spray to dry it out,
- * Never use your X&C horizontally as a plank,
- * Never use your X&C as a vertical fire escape/RESQ ladder. They are not designed to be opened vertical downwards. The pins will not hold the downward force,
- * Be careful not to press the vertical tubing of the stiles against concrete or other hard surfaces which may dent the aluminium,
- * Always rest rubber bung at the top against vertical or horizontal surface.

*Xtend & Climb opens easily
and safely from a compact
0.76m to a versatile 3.8m*
